# Get the **AGTREK** Advantage

From humble beginnings in 1997, **AGTREK** has worked with hundreds of dairy operations and developed Full Circle Management™, a global understanding of the on-farm dairy management chain. By recognizing that dairy profitability is a result of the entire dairy function, we help make your efforts go further.

With our deep technical know-how and practical understanding, we work with you to analyze various aspects of your operation and put in place plans for improvement.

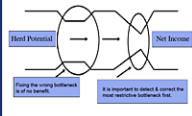

You can have confidence in **AGTREK**. We are recognized as independent dairy specialists whose on-farm service delivers unbiased, expert advice with action plans. Using sound science and industry insight combined with a strong business judgment, we help to develop your plans that can address:

- Forage management
- Nutritional programs with consideration for the full dairy operation
- Herd health factors
- Housing environment
- Standard Operating Procedures
- Benchmarking Tools for production & profitability
- Recommendations to improve efficiency and effectiveness
- Value decisions for expansion
- Business planning within regulatory contexts
- Collaborative dairy management team planning sessions and new implementations

We support these plans with detailed follow-up and the ability to track important key performance factors.

Helping you implement your  
image of the future
